|                                                 |           |
|-------------------------------------------------|-----------|
| <b>Preface.....</b>                             | <b>5</b>  |
| <b>Geography as a science .....</b>             | <b>6</b>  |
| <b>I. Picture of the Earth .....</b>            | <b>7</b>  |
| 1. Sources of geographical information .....    | 8         |
| 2. Elements of a map .....                      | 12        |
| 3. Map reading .....                            | 16        |
| 4. Revision .....                               | 20        |
| 5. Key words .....                              | 22        |
| <b>II. The Earth in the Universe.....</b>       | <b>23</b> |
| 1. The Earth as a planet .....                  | 24        |
| 2. Earth's rotation.....                        | 28        |
| 3. Earth's orbit.....                           | 32        |
| 4. Revision .....                               | 36        |
| 5. Key words .....                              | 38        |
| <b>III. Atmosphere .....</b>                    | <b>39</b> |
| 1. The weather and its forecasting .....        | 40        |
| 2. Air temperature.....                         | 44        |
| 3. Atmospheric pressure .....                   | 48        |
| 4. Precipitation .....                          | 52        |
| 5. Climate classification.....                  | 56        |
| 6. Revision .....                               | 60        |
| 7. Key words .....                              | 62        |
| <b>IV. Hydrosphere.....</b>                     | <b>63</b> |
| 1. Seas and oceans .....                        | 64        |
| 2. Groundwater and surface waters .....         | 68        |
| 3. Glaciers and ice sheets .....                | 72        |
| 4. Revision .....                               | 76        |
| 5. Key words .....                              | 78        |
| <b>V. Lithosphere. Endogenic processes.....</b> | <b>79</b> |
| 1. Structure of the Earth. Rocks .....          | 80        |
| 2. Plate tectonics .....                        | 84        |
| 3. Plutonism, volcanism and earthquakes .....   | 88        |
| 4. Revision .....                               | 92        |
| 5. Key words .....                              | 96        |

|                                                  |            |
|--------------------------------------------------|------------|
| <b>VI. Lithosphere. Exogenic processes .....</b> | <b>95</b>  |
| 1. Weathering and karst processes .....          | 96         |
| 2. Coastal processes .....                       | 100        |
| 3. Fluvial processes .....                       | 104        |
| 4. Glacial processes .....                       | 106        |
| 5. Aeolian processes .....                       | 112        |
| 6. Revision .....                                | 116        |
| 7. Key words .....                               | 118        |
| <b>VII. Pedosphere and biosphere.....</b>        | <b>119</b> |
| 1. Soils .....                                   | 120        |
| 2. Vegetation zones .....                        | 124        |
| 3. Revision .....                                | 130        |
| 4. Key words .....                               | 132        |
| <b>Glossary .....</b>                            | <b>133</b> |
| <b>Geographical names and terms .....</b>        | <b>143</b> |
| <b>Blank maps .....</b>                          | <b>150</b> |
