

Spis treści

Introduction	5
I. Geography as a branch of science	6
1. Studies of the Earth.....	6
2. System of geographical studies	7
II. Sources of geographical information.....	8
1. Maps as a source of geographical information.....	8
2. GIS – Geographical Information System	19
3. Statistical data as a source of geographical information	22
4. Sources of geographical information about a selected region	22
III. Natural system of the Earth	24
1. Interactions within the natural system of the Earth	24
2. Consequences of the Earth's movements	25
IV. Natural spheres of the Earth.....	31
A. Atmosphere	31
1. Structure and chemical composition of the atmosphere.....	31
2. Terrestrial heat balance	33
3. Variations in the Earth's air temperature.....	35
4. Movement of the air	36
5. Precipitation on the Earth	46
6. Climatic diversity of the Earth.....	50
7. Weather forecasting and measurements	56
B. Hydrosphere.....	59
1. Water circulation	59
2. Seas and oceans	60
3. Land waters – groundwaters	70
4. Surface inland waters	74
C. Lithosphere	83
1. The inner structure of the Earth.....	84
2. Minerals and rocks	88
3. Processes shaping the Earth's surface	91
Internal processes (endogenic).....	91
• Plutonism and volcanism	91
• Earthquakes	95
• Orogenesis	100

• Epeirogenic movements.....	101
• Endogenic processes as the basis for the formation of geological structures	101
External processes (exogenic)	104
• Weathering	104
• Mass movements.....	106
• Wind action (aeolian processes)	107
• River activity	110
• Karst phenomena	113
• Coastal erosion	115
• Activity of glaciers and ice-sheets	117
 D. Biosphere and Pedosphere.....	121
1. Soil-forming processes.....	121
2. Zonal, azonal and intrazonal soils	122
3. Soils in Poland.....	126
4. Soils types in agriculture	127
5. Diversity, interrelation and importance of the biosphere in the natural system of the Earth	128
 V. Environmental balance – regulatory mechanisms	142
1. Environmental balance.....	142
2. Causes and the effects of the disturbances in the environmental balance	143
3. Sustainable development	149
 Bibliography	151
 Glossary	152
 The book contains annex illustrations:	
1. Map of Poland (1916) made by Prof. Eugeniusz Romer	16, 17
2. Types of projections.....	16, 17
3. Threats to the natural environment – satellite images	64, 65
4. Physical map of Poland	64, 65
